

## Technical data

Brand	Belling
Appliance type	Built-in Oven
Rating / Supply Voltage and frequency	220-240 V 50/60Hz
Max power	3.0 KW
Oven lamp power	25 W
Top heating element (W)	950
Grill heating element (w)	2000
Bottom heating element (W)	1100
Convection heating element (W)	2000
Convection motor (w)	34
Cooling fan (w)	30
Cleaning (Enamel/catalytic/Pyrolytic)	Enamel with catalytic
Net Weight kg	35
Product dimension (W*D*H)	595*575*595mm
Cabinet/furniture cut-out sizes (W*D*H)	560*570*606mm
Energy Class (letter for the sticker) *	A
Energy consumption Kwh	
Heating function	
Conventional	0.99
Forced air convection	0.87
Usable volume (litres)	70
Size : (Small/Medium/Large)	Large
Noise Db(A) re1pw	58
Made in	PRC

## Important information

The appliance is designed to be permanently installed with a three-pin power cord and may only be connected by a licensed expert in accordance with the connection diagram.

Only a qualified electrician who takes the relevant regulations into account may replace the power cord.

Do not use multiple plugs, power strips or extensions. Overloading causes a risk of fire.

If the connection is no longer accessible following installation, an all-pin isolating switch with a contact gap of at least 3 mm must be provided.

### Connect the wires of the mains power cord in accordance with the following colour coding:

Green and yellow      Earth wire (E)

Blue                  Neutral wire (N)

Brown                Live (L)
